# Atlantica online mercenary leveling guide

Atlantica online mercenary. Atlantica online guide.

Therefore, the main thing is often a musician. There is much more construction and even you are your own personalized construction (that would be the best ^-^). Available at level 100 x x x x x x x x x x lose HP but you can't hit or opartancle a better chamán version. This is possible by the column coup of Gunner/Jannissary, successful of gunner/celler. Very ostile fiery if used in melee construction. Do you like to freeze enemies and hit more? Spike Build: formed mainly by mercenaries that cause a high damage to a single enemy mercenary as pirate and archers that can hit enemies in any position. One of the most expensive mercenaries to obtain ... the music makes you. There are some examples: Stun Build: mainly formed by Gunner and Artillerist. Its objective is to stun the greatest number of possible enemy mercenaries. "Protection shield: this is an active form of protection, the main one cures you and, I do not remember exactly, you should also give some defensive bonds ... your bib or buy =) It can be taken at level 44. Labeling: Atlantic in line, level, mercenary atlantic in the length of the longbowable mercenaries of content 1) General description of the mercenaries 2) Bascul information about how to use mercenaries 3) Build examples 4) a principal who could adapt to you 5) Ways to obtain new mercenaries means of melee Much Daá ± o. His skills are: silence, mortal shot. Also the spears are decent and the axes can stun in the front row. Simp as possible. Anyway, is a good character for in the second row, so it can stop an entire enemy row (if the enemy has a monk, it must be combined with Archer Silence or Exorcist Mana Seal). The giant/jewel glass is used to improve it. His problem is the low defensive magic that makes him a bad had tank When it was updated at level 100 north of Viking, the defense of defense becomes pleasant enough, it also has deadly attack skills. X X X X X X X O O O O O B. Masterwitch She is an AOE (effect of effect). The fearsome jargon spell of it can stop the enemy for several shifts. Dot Build: The object is to deal with the greatest possible number of enemies as possible with time (points = damage over time). It can work greatly, it can work well, it may not work ... just try, this is another fun part of the game =) " ã, - 3) try, even from the beginning, decide what type of construction will have This makes it a ostile character of construction of spike XO or o ogunnershaman used to cure the equipment and, almost what I believe, should always be used and obviously in the last row. It hits the enemies in an Ejea, wears ball balls on hand, so it is really good for Keep the pressure on the enemy formation. O O ospearMangunner, Gunner hits 3 enemies in a line, decreasing its damage while hitting. Available at the level 100 x x x x x x or o o o o opirecannoneer better version of the gunner generally exchanged with gunner. So it doesn't really matter, since everyone has the same problem: they are level 1. She also takes her often because she is cheap enough. Sorry, soon get information about it. X X X X X X O O LEMENTALIST "" In a battle, the potions of Manaves are not so a pratalas. -Brutal Will: It affects one of you in the row (after the level of level 20) and The mercenaries will have attack bonds, HP, but they will attack automatically. The price is low enough (Archer 20,000 Gold, almost 40,000 monk). Iãeããã only copy some important levels here: Level Grade D Grade C Grade B Grade A 2,079,007 2,494,808 3,382,960 4,587,295 60 5,218,628 6,053,608 8,027,084 10,643,914 80 23,446,617 25,322,346 32,058,090 40,585,542 100 200,000,000 200,000,000 241,200,000 290,887,200 120 2,000,000,000 2,000,000,000 2,100,000,000 2,205,000,000 130 8,766,404,662 9,743,045,128 10,619,685,594 11,575,202,684 140 35,047,061,897 38,601,754,007 41,905,206,644 45,490,456,290 150 123,650,000,000 147,280,000,000 159,720,000,000 para obtener un espadachán, Gunner o Monk a nivel 100, necesitarãa 40 x 5 males. It is almost always used in the construction of stun or at some time in a seth, the main formation skills are: -With mortal shots, you make an addition -500). The giant crystal/jewel is used to update it. They are not bad =) all the skills I put are for mercenaries, not for the main skills, so skills such as breaking out. In addition, level 100 skills (only arrow cascade) are left out because if you reached level 100 with the mercenary you do not need any guesses ^-^ 2) well, now you will put some basic information (and sometimes obvious ) On how to use mercenaries: 1) Distance mercenaries (Archer, Prophet, Gunner, Artillerist ...) They are usually placed in the second or third row for their low physical defense, but some people also put their main archer in the first line. You can summon 4 types of masks: Bot of automatic break in level 1 with level 1 invocation, small catapult at level 20 with the level 5 call, catapult at level 50 with level 10 of the call and the at level 80 with level 60 Summon. Ok, first of all, Spearman reaches 2 characters, the first one hard, the second lowest. You can even save gold by not giving it complete complete But a good weapon should be on the list of pending tasks, since the murder will be much more easy. Jenázaras can use a powerful shooting posture magic to cause severe dais in enemies in the next turn. It will need billions to update it, so it is better that it is a worse mercenary well updated than it, very improved. But sometimes mercenaries like Exorcist, who has a low physical / music defense and prevent it from blocking his great magic, usually puts himself in the second or even the third row. The green is remote. Available at level 76 x x x x x x or o ooraclepirate, it is like a sword, but its def and its vitress are lower, its damage is very high. -Shield Shot: It makes the first two enemies enough in a line. Skill: Smoke pump (Debuffer) Available at level 87 o o o o o p.s. He struck inside. Blue means magic. 1) Archer can be used normally or can be used to finish enemies when they move to the row of targets to survive. 2) The melee mercenaries (Espadachán, Lady Knight ...) must be placed in the first line as tank (= high def and vit). He always had almost never seen him in other positions) in the second row (or third). They use spears and shields together in combat. She only has 1 skill with which she hits the entire enemy team. From what you have already understood by her name, she uses a sword and a shield, she can only hit 1 enemy in the front row. Whenever she can, she always updated her mercenary because even if she changes it, having it more powerful for some time will help a lot. She she used to hit or the enemy monk to prevent her from awakening her teammates or in the main formation of the enemy formation so you can reach a very high number of enemies. 4) The most fierce but not more cheap is to buy the mercenary article of invocation ^-^ That they like my guide and that for any problem/error/new ideas/help simply give me and will provide to update this guide to help new players choose to build the building. You like stopping to move? It can be taken at level 57. Here is the experience table by level and grade: a e degrees: a (glass/jewel of soul of mãt!tipos tones) B (Dragon Crystal/jewel // Dragon Soul Crystal/jewel) C (Giant/Phoenix/Redemption Crystals/jewels // Giant/Phoenix/Redemption Soul Crystal/jewel) D (Condition Condo, depending on the degree. 3) The medical mercenaries (Oracle, Monk, Shaman ...) must always be placed in the second or third row due to their low defense, but even some mercenaries, such as the witch, sometimes they put themselves in first row. It will be replaced at level 80 by Cannoneer. Used very often at a high level in the front row to cover a dilan line because it is generally the last character that hits the front of the front because it is very difficult to tear it down. Mercenaries available: Swordsman, Spearman, Gunner, Archer, Chaman, Monk, Artillerist, Viking. P.S. In general, all constructions have some tanks in the front of the front and a chamán/monk in the last. The only ability that shaman has better is the noble sacrifice. Spearman/Gunner makes you. 4) Then, as you have seen, almost all mercenaries could be placed in many positions, so that you only decide what you want and prujalo. She must have 1 poise skill and 1 skill of high damage similar to the deadly blow, but that consume less AP one of the best picos mercenaries. Do you like to hit a very high number of enemies and so impressive more? Good character often used at high levels. Her main skills are: Flame Sword: makes a very good amount of dava. Do you like to be able to hit who is the best? The gunner makes you. Dark seed: This is used very rarely, but if combined with hexadecimal of darkness, the flame of hell arises. Great in the construction of Atardir and also very good in Seth, they will be because their very high attack power. It should be put in the last row and its main skills are: "Santa Guardia: one of the most used skills, affects the entire row (after the update of level 20) and in the affected row it cannot be used the magic. Surely do not after level 10). Ashen Crystal/jewel is used to improve it. O o oanoneerjannissary can interrupt the battle formation of enemies with greater attack power than gunners and inventors and their high health allows them Supporting more attacks. It can be taken at level 1. Do you like to debut enemies? The main one is counted as D. usually, the most level skills are awakening and protecting/protecting protection. Xo XO XO XO XO XO XO O OR OINVENTOLEALISTA GOOD CHARACTER USED AGAINST MODERNARIES BODY O o o o o o p.s. He struck inside an área or oartilleristb.master, she is a good tank and she hit a row with with Attack like Vikingo. He used a lot in AOE formations. His main ability is a deep idea that the low defense and vitality of the line beaten by magic. It is best to do that before delivering missions. Personally, it seemed like a very pleasant construction ... 3) Make the bust to win the article that summons the mercenary directly in your team. AP (action points) is needed to do any action in a battle, so many people put 3 spears in their formation to prevent enemy lines from moving. The three rows are available to be beaten. (It also gives them some HP in each round, lasts 3 rounds). The staff does it. Main skills: -heal: She cures a row (after updating it at level 20) for a good amount of HP. She wear hand bullets. She can be put in the front row because it is a good tank, not the best, but being in the front row should not give so many problems. She she always puts in the front row and one of the best tanks you can have. She is a chestly character like the monk, but her main ability is: the frozen atmosphere that weakens the enemy melee characters and blocks the enemy medical power. Archer makes you. X X X X X X O O Oshamanmonk One of the most used characters á é á é (sometimes even two monks in the same formation). Congratulations, you just added a new mercenary to your formation. It can be taken at level 70. Great in stunning constructions. It also has some maná recovery skills and maná block. Ax makes you. "Awakening: Another very good ability, affects a complete row (after the level of level 20) and the affected row will gain a bit of HP and the combined counter will go to 0. Available at level 95. Phoenix Crystal /Jewel is used to update it. Obviously, this is just a summary of the mercenaries that can be chosen main " ã e ã, - ã e ã, - ã e ã e "A e ã ã Mercenaries: 1) Basic mercenaries can be purchased at the NPC in the initial city.
